

Milan Prajapati

Vancouver, BC | (778) 855-1756 | mbprajapati1732@gmail.com | [linkedin.com/in/itsMilan1999/](https://www.linkedin.com/in/itsMilan1999/)

SUMMARY:

Data Operations Engineer with expertise in data management, data reporting, cloud technologies, data migration, Microsoft Fabric, and BI solutions. Proficient in transforming complex datasets into actionable insights to drive strategic decision-making and business growth.

EDUCATION

Master of Professional Studies (M.P.S.), Data Analytics | **Northeastern University** (Vancouver, BC)

Bachelor of Engineering (B.E.), Computer Engineering | **Gujarat Technological University** (Gujarat, IN)

EXPERIENCE

Cover Genius

Burnaby, BC

Data Operations Analyst

November 2025 – Current

- **Partnered with external stakeholders** and underwriting teams during contract finalization to architect compliant data infrastructures adhering to regulatory and governance standards.
- Standardized the **monthly reporting platform** by engineering DBT models to transform terabytes of transactional data and automate complex tax and compliance calculations.
- Built and maintained Apache Airflow DAGs to automate data delivery across daily, bi-weekly, and annual schedules, enforcing encryption standards to secure data in transit.
- Led technical integration and alignment calls with major partners (e.g., **AWS, United Airlines, Ryanair, Airbnb**), ensuring continuous platform compatibility and maintaining **99%+ uptime/availability**.
- Managed end-to-end database lifecycles from dev/test to production setups, for new product initiatives, serving as the technical lead to drive platform scalability.
- Evaluated **leading LLMs** (including Claude, LLaMA, and GPT) and architected a **secure sandbox environment to integrate** AI capabilities across the organization while **ensuring zero risk of data leakage**.

Altea Healthcare

Burnaby, BC

Senior Data Engineer

March 2024 – November 2025

- Analyzed organizational needs and future vision to design and implement a **Star Schema** for database optimization, ensuring smooth migration of company data while maintaining daily operations and reporting.
- Wrote **DAX formulas** for calculated columns and measures to enhance data models, identify KPIs, and utilize **M Code** for efficient ETL processes and created interactive Power BI dashboards to support reporting modules.
- Developed advanced SQL queries leveraging **window functions, subqueries, and CTEs** to extract and provide detailed reporting data for the Finance department, handling both project-based and ad-hoc requests.
- Built advanced **Excel models** using **LOOKUP functions** to automate bi-weekly revenue calculations for individual clients, enhancing reporting accuracy and efficiency.

Data Engineering and Pipeline Development

- Designed and developed workspaces with advanced data management solutions, including **Data Lakehouse, Data Warehouse, Data Flows, and Data Pipelines** to collect data from various sources and establish a **centralized database system** for efficient data storage and management.
- Utilized **Python Notebooks** within **Microsoft Fabric**, leveraging frameworks like **Pandas, PySpark, and SQL scripting** to perform ETL tasks as per project needs.
- Established a production workspace using **Git** and **Azure DevOps** for version control and managing production environments in Power BI.
- Built optimized data models using the **Direct Query** method and implemented **Direct Lake** in Microsoft

Fabric for efficient data handling, especially as data model sizes increased rapidly.

- Embedded Power BI dashboards into the **EMR system** and implemented **row-level and role-based security** to ensure data confidentiality and controlled access.
- Set up tools such as the **Microsoft Capacity Metrics App** to monitor daily usage and performance.
- Configured **DAX Studio and Performance Analyzer** to diagnose and optimize Power BI performance, ensuring efficient query execution and improved dashboard load times.

Nursing Community Assessment Service (NCAS)

Vancouver, BC

Data Engineer

January 2023 – February 2024

- Collaborated and brainstormed with operations stakeholders to understand and define analytics requirements for Creating actionable dashboards, reports, and key metrics.
- Redesigned the Patient Reporting Model by gathering all historical organizational data and implementing a **bucket processing method to optimize data** loading and significantly reduce processing time.
- Analyzed the **reimbursement system** to identify reporting errors by studying historical data. Made necessary changes in **SQL queries, data cleaning steps, and redefined the reimbursement model**. Validated the updated figures and outcomes to ensure accuracy and efficiency.
- Created dynamic and interactive dashboards using **bookmarks and advanced visuals**, integrating additional external data visualizations seamlessly within Power BI for enhanced user engagement.
- Efficiently maintained a database of over 50,000 patient examinations and designed a schema that resulted in 80% faster processing of **SQL queries with improved normalized data structure**.

Pandavaz IT Services

Gujarat, IN

Data Engineer

July 2019 – September 2022

- Consolidated data from diverse sources into structured models, optimizing data flows for analytic use.
- **Integrated Google Analytics** with the client's website to enable **user behavior analysis** and provided actionable data insights to support **social media marketing campaigns**.
- Managed data modeling and transformation processes to ensure seamless integration across multiple data sources.
- Automated ETL processes and developed **data pipelines using SQL, SSIS, and Tableau to improve operational reporting**.
- **Developed advanced Excel models** based on reporting requirements, utilizing **predictive modeling, pivot tables, VLOOKUP, XLOOKUP, Power Query, and Power Pivot**. Designed interactive **Excel dashboards** with dynamic charts and slicers for enhanced data visualization and decision-making.

SKILLS

Programming Languages: Python, SQL, Google BigQuery, R, JavaScript

Data Visualization Tools: Microsoft Power BI, Tableau, Power Automate, Power Apps

Databases: MySQL, PostgreSQL, SQL Server, Oracle, DBT, Airflow

Cloud Platforms: AWS, GCP, Azure

CERTIFICATIONS:

- **Microsoft Certified:** Power BI Data Analyst Associate
- **Microsoft Certified:** Fabric Analytics Engineer Associate
- **AWS Cloud Practitioner**
- **AWS Data Engineer**
- **HackerRank Python Gold Badge**
- **HackerRank SQL Gold Badge**
- **Tableau for Data Scientists**
- **IBM Data Science**
